

Enterprise Project Management for IBM® Lotus® Quickr™

Transform Quickr into an Open Project Server Platform

ProjExec for Quickr is the solid alternative to Microsoft® Project Server and SharePoint for IBM Lotus customers – at a fraction of the cost. The Lotus award winning enterprise project collaboration solution is complete with a Microsoft Project Connector to manage the complete integration of Microsoft Project in Quickr for effective and affordable collaborative project execution.

There's no need to change the way you work on projects. With ProjExec for Quickr, just make the way you work simpler and more effective.

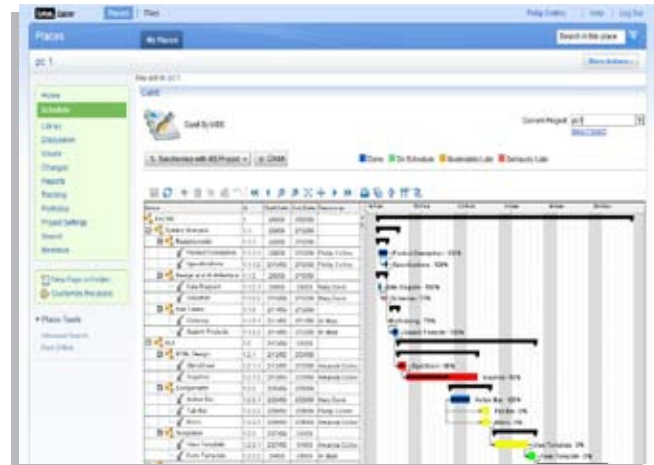

Whether you are a project manager using Microsoft Project or other planning tools and need an affordable and robust solution for project collaboration – or you are part of a team that wishes you had the power of Microsoft Project from within Quickr - there is a single integrated solution for all of your project collaboration needs.

Project managers continue to use their project management tools of choice. Simply upload plans and schedules to the collaborative Quickr environment and let project team members interact with the schedule and participate directly in the project management process while enjoying an intuitive Web 2.0 user experience. Or use ProjExec's Gantt editor and full project scheduling capabilities right from the web in a Quickr place.

Best TOTAL Lotus Software Solution

ProjExec for Quickr is the recipient of numerous honors, most recently the 2009 IBM Lotus Award for Best TOTAL Lotus Software Solution. ProjExec for Quickr takes full advantage of the powerful features of the Quickr platform to create an intuitive user experience that encourages project participation, content sharing and project collaboration, including seamless integration with

- Sametime
- Notes calendar
- Domino
- Lotus Connections
- Quickr Document Library

Robust project templates and tools

ProjExec for Quickr includes robust templates to create project places in Quickr with ease. Customize ProjExec project places with out-of-the-box Quickr components, like content libraries, discussion forums, blogs and wikis.

- **ProjExec Project Place** - Publish, schedule, manage and track progress for multiple projects from a single project place. Complete project planning and execution functionality, including:

- Visual Gantt editor with critical path analysis
- Publishing to/from Microsoft Project
- Time Management
- Issue and Change Management
- Resource Management
- Ad hoc reporting

- **ProjExec Portfolio Place** - Analyze and track multiple portfolios of all projects for complete cross project visibility and control.

- **ProjExec Administration** - Conveniently manage default settings and configuration options for ProjExec places in Quickr.

Benefits and Beneficiaries

ProjExec for Quickr delivers benefits to all project participants and stakeholders – from team members to project managers to LOB executives.

- **Project Managers** - Save time, save money. Focus on project execution, not project administration.
- **Distributed Team Members** - Share, contribute, track time and task progress with ease.
- **Line of Business Executives** - Enjoy visibility and control with dashboards, cross-project portfolios.

Project management for everyone

ProjExec Express - All the essential scheduling, tracking and project management tools in a single Quickr place. Complete with dynamic visual drag and drop Gantt charts, cross-project/multiple project support with alerts, dashboard, portfolios and more! Ideal for smaller teams or single departments within larger organizations.

ProjExec Enterprise - Comprehensive enterprise class project life cycle management that typically targets larger organizations managing complex projects. All the features of the Express edition plus workflow, issue, change, time management and ad hoc reporting. The cost effective alternative to Microsoft Enterprise Project Server and SharePoint.
